Subject: Microsoft Settlement

Hello,

Please don't fail to recognize Microsoft's misuse of power in this industry. The current settlement only rewards Microsoft by allowing them to further expand their monopoly into the education market. The XBox is nothing more than a ploy for Microsoft to secretly merge their way into the PC industry. Mark my words, you will see office applications and a keyboard and internet and .NET for the XBox. It will continue to sell for \$300 and put companies like Gateway and Compaq out of business. Microsoft is dangerous, and abusive with their power - do not fail to recognize this.

If you want to make a difference consider having Microsoft purchasing new Apple iMacs or iBooks for schools and allow Microsoft to bundle Microsoft Office with these computers, at OEM pricing.....

Thanks,
Dave
